

A Celebration of Creativity and Community at the 2026 Artability Art Show & Sale!

This year's Artability Art Show & Sale featured more than 400 pieces of art, over 20 written works, and the talents of more than 100 artists!

Guests connected with one another, shared their stories, and enjoyed a vibrant atmosphere filled with delicious food, interactive painting, and more.

Best in Show Goes to...

Bejeweled by Kao Xiong!

The winner of Best in Show at the Artability Art Show becomes the next year's Artability Ambassador. Their winning artwork embodies the spirit of Artability through creativity, community, and resilience. It is featured on promotional materials such as T-shirts, posters, and event graphics. As the Artability Ambassador, the artist helps share the connection between art and mental health through their work.

2026 Artability Moments!

Give to the Max Day Is This Month!

For a child struggling with their mental health, getting help should not depend on transportation, time away from work for the parents, or knowing how to navigate a complicated system.

People Incorporated brings mental health care directly into schools and extends support into homes and community settings so children and families can receive care where life is already happening.

From November 1-19, your Give to the Max gift will support our Children and Youth Services. We provide accessible therapy and mental health services in schools, partnering with school teams to support each child's unique needs. By becoming part of their school community, we offer steady, personalized care and a reliable source of hope.

Your gift can open the door to care. It can mean a trusted therapist nearby, a family connected to support, and a child better able to learn, grow, and imagine what's next.

Watch our social media accounts for more details in the coming weeks, including fun ways to participate and help maximize your impact. We can't wait to share what's ahead!

Learn more & support our campaign through our GiveMN page.

Integrated Services experience shared by client's Targeted Mental Health Case Manager

I have a client in case management that I have been working with since 2017. Prior to case management, he was in our day treatment program. He has since used School-Based therapy and is currently in school-based CTSS. He has utilized our summer group programs for three summers now and, in fact, looks forward to them. His family benefits from our services and the fact that we're all under one umbrella and that we have the ability to communicate with each other at People Incorporated.

CTSS Group Services, client experience by client's Targeted Mental Health Case Manager

One success story that comes to mind is a client who was initially hesitant to attend group services due to anxiety and uncertainty about being around peers. After attending, she shared that she actually enjoys the group and that it was much better than she expected. Seeing her move from reluctance to engagement highlights the positive impact our programs can have.
